Aquastar 74' *Built 2005*

Built under survey in 2005 for an experienced yachtsman and maintained from new by permanent full time skipper and mate. Engines serviced annually by accredited Caterpillar Engineers and UK electrical engineers providing regular maintenance and upgrades. The stunning teak interior well looked after and showing the skill built into these classic motor yachts. Without doubt the best Aquastar 74' to come on the Brokerage market. This model is one of the MK II craft with larger portlights to master midship cabin, with a total of 5 cabins, including double crew cabin, all with en-suite facilities.

With extra fuel capacity, totalling over 11,000 litres, two water makers, two generators and a large service battery bank, amongst other features, this yacht has been designed for extended cruising without the need for frequent marina calls.
